# BACKPACKS

Every hiker needs a backpack to carry the 10 essentials with them on the trail. Backpacks come in all shapes, sizes, and variety enough to suit every hiker.

**DAYPACK:** THESE PACKS ARE THE SMALLEST OF THE BACKPACK FAMILY. LIGHTWEIGHT AND USUALLY LACKING A HIP BELT, MOST DAYPACKS AREN'T FIT FOR A SEVERAL DAY EXCURSION, BUT THEY ARE PERFECT FOR STUFFING WITH THE 10 ESSENTIALS.

**External frame: it has several organized compartments and additional gear can be strapped to the outside frame. The trade off is that lashing items to the outside is inconvenient and prone to weight distribution issues.**
